

In a world where sustainably grown crops are paramount, the demand for high-tech greenhouses is ever increasing; a challenge Van der Hoeven is equipped to meet.

We have been designing and realizing worldwide horticultural projects since 1953, projects that enable growers and investors to see maximum return on their investment. We offer crop consultancy where necessary and deem after-care most important. This in part underpins our long-term relationships with our clients. That makes us proud. Every day we join forces with a large team of professionals to work on project optimization and new system development. Always with the same objective in mind: bespoke projects for our clients.

We are currently looking for an **Engineer Installations**.

In this position you will translate the design of our (turn-key) horticultural projects to installation drawings in close co-operation with our Project Designers and Project Managers. Your contribution to the integration of different systems for climate, water technical and electrical installations will be substantial. Furthermore, you will be responsible for translating the drawings into materials lists and you will keep in touch with our Procurement Department and external suppliers. The position of Engineer Installations will allow you in term to expand your activities to the field of Project Design.

The job profile:

- Technical background
- Skilled in AutoCAD; experience with a 3D drawing program is a plus
- Affinity with horticulture
- Skilled in the English language, both in spoken word as in writing; skilled in the Dutch language is a plus
- A flexible and positive attitude
- A client-oriented approach
- Solution-oriented and accurate

Van der Hoeven is offering a varied position with leeway to use your own initiative. The organizational culture is down-to-earth, pragmatic and engaged. The position naturally goes hand in hand with an appropriate benefits package.

Does the above profile speak to you? If so, please send your application letter and CV to Heleen van der Vaart, HR: h.vandervaart@vanderhoeven.nl.
